

# TRI FIXX

- **NEW High Performance Masonry Anchor**
- **CSK UnderCut Ribbed Head, 7.5mm x 62, 82 or 102mm**
- **TORX recess for optimum drive efficiency**
- **Time Saving Installation**
- **Patented thread ensures fast insertion at lower torque**
- **Only 6mm pilot hole required through frame, reinforcement and brickwork**
- **Cost effective and simple**

# STARFIXX™

## Masonry Frame Anchor

**USE WITH STARPLUS ADAPTER FOR EVEN QUICKER INSTALLATION**

- **Simply pushes onto any SDS or masonry drill**
- **Takes any standard bit**
- **Converts your drill to a driver with just one click - in seconds!**

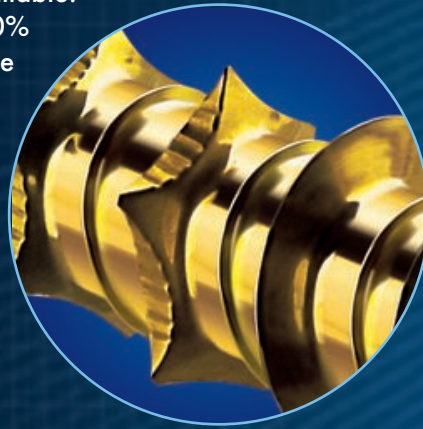

## SAFE

The TORX recess provides optimum drive efficiency improving grip and extending bit life.

## LOWER TORQUE

The STARFIXX™ is probably the most efficient direct frame anchor available. The patented thread provides 30% quicker assembly. A cost effective and time saving installation with exceptional holding power.

## SECURE

High thread cuts into masonry whilst the low thread compacts loose material for maximum holding strength.

## FASTER

No need for a plug means a quicker installation. STARFIXX™ masonry frame anchors eliminate the time wastage associated with nylon fixings.

## RECOMMENDED EMBEDMENT

The highly efficient STARFIXX™ thread lowers torque and achieves optimum engagement into all kinds of brick, stone, concrete and wood.

## COMPARATIVE PERFORMANCE DATA

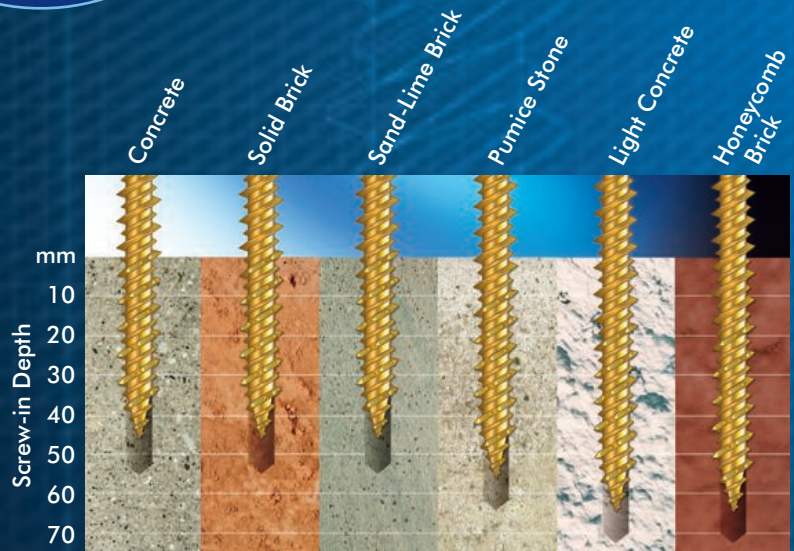

- Solid brick with a 6mm pilot hole

RECOMMENDED  
WORKING LOAD (kN)

	Tensile	Shear
7.5 x 82mm STARFIXX™	2.6	6.0
M6 x 75mm CSK SLEEVE ANCHOR	1.8	2.5

1kN = 100kg of force.

NOTE: A safety factor of 3.0 was used to determine tensile and shear recommended working loads. In all test cases the brick began to break up before the thread deformed.
